Focus on A County

This is a DRAFT VERSION for a Partners for Our Children automatically generated regional report. Generally, the reports could be generated for any county; this sample report will focus on A Specific County.

Much like the Data Portal itself, the default report has three section: Investigations & Assessments, In-Home Services, and Out-of-Home Care. As a starting point, we give each of these two part, the first a detailed Trends-style history specific to the focus county, the second a dotplot to put the focus in context within its region. Of course, adding more is possible--safety measures and the other categories that come with Out-of-Home Care would be easy to tack on. (In fact, it would be easy to give the user the ability to select which sections are of interest.)
